## IAFCB INTERNATIONAL ACCREDITATION SERVICE

Note: The above scope of accreditation is based on the statistical nomenclature for economic activities NACE rev. 2 and

recommended by IAFCB ID 1:2014.

The scope of accreditation represents broad classifications granted by IAFCB on the basis of the management system

certification processes demonstrated by the certification body (CB). Accreditation is based on the competence and ability

to effectively apply the requirements of the relevant certification standards listed in the CB's scope of accreditation. IAFCB

accreditation entails review of the CB's own management system, on-site assessment of the CB's certification processes,

review of CB's access to expertise including onsite observation of the CB when conducting certification audits at client

sites. Under the conditions of accreditation, the CB is obligated to use equivalent certification practices covering the

specific scopes as listed for all clients and as demonstrated during the accreditation process. Accreditation does not cover

certification in areas outside the scope of this accreditation certificate. Accreditation does not imply endorsement of the

products or the design or performance characteristics of products certified by the CB.
